

HOSE WASHER

The Delta Hose Washer provides an easy means of cleaning all types of fire and water hose. Two wide angle forward facing internal jets help to push the non-pressurized hose through the drum cleaning as it passes through. The hose washer is designed for use between 6-8 bar with a flow rate between 200 and 400 L/min

Fitted as standard with a 2" BSP male threaded inlet for compatibility to any International Adaptor.
